Address
Bato, Leyte Philippines

EDUCATION

2019-2023

BS in Information Technology
Southern Leyte State University

EXPERTISE

- Web Development
- PHP
- Laravel Frameowrk
- CSS/BOOTSTRAP
- Javascript
- Jquery
- API integration

INTERESTS

Gaming

Coding

Learning new technology

Jake Getil
W e b D e v e l o p e r

- Full Stack Developer intern at Southern Leyte State University, responsible for both back-end and front-end development. Created complex algorithms, debugging and fixing errors, implemented new designs and features based on client preferences, and deployed the system to ensure seamless operation and compliance with requirements. Developed valuable experience in both technical and client-facing aspects of software development.
- Programmer in capstone project, I was the only programmer responsible for designing and developing the project. This involved creating complex algorithms and revising the project multiple times to achieve the desired results. Additionally, I was responsible for debugging and fixing errors in the system to ensure optimal performance. Through this experience, I developed strong skills in software design and development, problem-solving, and attention to detail.

WORK EXPERIENCE

Jan - May 2023
Southern Leyte State University - Information System
Full Stack Web Developer
Intern

- Designed and developed responsive interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Specialize in implementing complex algorithms on the backend to improve system performance and scalability.
- Designing and implementing scalable and secure databases using MySQL
- Integrating front-end applications with back-end systems and third-party services.
- Debugging and resolving technical issues related to back-end systems and databases.
- Keeping up-to-date with emerging trends and technologies in back-end development and contributing to the company's technical knowledge base.
